Blind rivet nut setting tool

Lindova PNT is a professional range of air hydraulic tools for setting blind rivet nuts.

The tools are easy to operate and combine all the features needed to guarantee fast, reliable assembly. The design incorporates tried and tested pneumatic engineering technology. The result is a highly practical tool for demanding production environments.

Setting blind rivet nuts is simply done by squeezing the trigger three times, with threading off achieved on the third squeeze. The PNT tool is controlled by direct-acting, non-automatic valves. The stroke is easily adjusted to provide the optimum degree of heading, providing the joint with the required strength.

The unique design provides a tool that is well-balanced and easy to handle, minimizing strain on the operator.
